What is this product?

Type

This product is a Unit Class in C WorldWide Global Equities Ethical under C WORLDWIDE (also called a UCITS).

Term

The PRIIP does not have any maturity date.

The PRIIP manufacturer is not entitled to terminate the PRIIP unilaterally.

The PRIIP cannot be automatically terminated.

Objectives

We aim to achieve a long-term growth of your capital by investing in shares of a limited number of attractive companies worldwide, including emerging countries.

We take investment decisions on the basis of a thorough financial analysis of companies. This analysis is combined with an evaluation of financial markets through the identification of global trends, allowing us to build a concentrated portfolio of 25-35 high conviction stock picks, ensuring a sufficient risk diversification and promising investment opportunities on the long term.

The Sub-Fund promotes, among other characteristics, environmental and social criteria, and the companies in which we invest are compliant with the 10 principles of the UN Global Compact at the time of the initial investment.

You may buy or sell units on any bank business day in Luxembourg.

We actively manage the Sub-Fund and we are not constrained by a benchmark as such. MSCI All Countries World Index (EUR) is exposed only to put the

performance of the Unit Class in context with the market in which it invests. The Unit Class does not intend to track it. The Unit Class can materially deviate from this benchmark and may invest in securities that are not included in the investment universe represented by MSCI All Countries World Index (EUR), so that the Unit Class's portfolio allocation is not directly defined by the composition of this benchmark.

This Unit Class aims to distribute income to you once a year.

Intended retail investors

This Sub-Fund Unit Class is suitable for investors with all levels of knowledge and/or experience, seeking capital growth and who have a long-term investment horizon. It may not be appropriate for investors who plan to withdraw their money within 3 years.

Depository

C WORLDWIDE's custodian is Bank of New York Mellon SA/NV, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This indicates that poor market conditions are likely to impact the expected returns of your investment.

The indicator does not take into account the liquidity, emerging countries and concentration risks of investing in the Unit Class.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

If the Sub-Fund is included as part of another product, e.g., unit-linked insurance, there may be other costs for that product.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- EUR 1,000.00 is invested

We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- EUR 10,000.00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 171	EUR 639
Annual cost impact (*)	1.7%	1.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.5% before costs and 10.8% after costs.

Composition of costs

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

Considering the underlying investments (equity investments) as well as the goal of creating a stable long-term return while respecting the risk, an investment period of minimum 3 years is recommended. There is no maximum for the recommended investment period.

You may buy or sell your units at the current Net Asset Value on any bank business day in Luxembourg. If you sell before the end of the recommended holding period, the return may differ from the scenarios listed above.

No fees nor penalty apply for disinvestments prior to the recommended holding period.

How can I complain?

Any complaints regarding the operation of the Fund should be submitted in writing to the Management Company or to the Depositary for transmission to the Management Company.
