Barrow Hanley Concentrated Emerging Markets ESG Fund

I GBP Acc IE000TVY4CS1

A sub-fund of Perpetual Investment Services Europe ICAV

Managed by Perpetual Investment Services Europe Limited

Objectives and investment policy

- The investment objective of the Fund is to seek to outperform the MSCI Emerging Markets Index (the “Benchmark”) over a full market cycle through a concentrated emerging markets strategy composed of high conviction, fundamentally researched ideas. There can be no guarantee that the Fund will achieve its investment objective.
- The Fund may invest up to 100% of the Net Asset Value (“NAV”), directly or indirectly, in equities and equity-related securities, including, but not limited to, ordinary shares, preferred shares, convertible preferred stocks, rights, securities of issuers directly or indirectly in the form of American and Global depository receipts and closed ended investment funds, including real estate investment trusts (REITs) (it is intended that investment in REITs will be less than 10% of NAV). The equity and equity related securities to which the Fund will be exposed will not embed derivatives and/or leverage. The Investment Manager will primarily invest in equities and will seek exposure to equity related securities in circumstances where direct exposure to certain equity securities is uneconomic, impractical or not possible.
- The Fund may invest up to 10% of its NAV in one or more eligible collective investment schemes (including open-ended ETFs and money market funds). The Fund may also invest in closed-ended CIS, which meet the requirements of transferable securities for the purposes of the UCITS Regulations.
- The Fund may invest up to 100% of NAV in emerging markets and up to 10% of NAV in frontier markets on an opportunistic basis.
- Where deemed necessary, the Fund may also hold cash (including in currencies other than the base currency) and cash equivalents including money market instruments. For liquidity or cash management purposes, the Fund may hold up to 100% of the NAV of the Fund in cash or ancillary liquid assets at any time, however, in normal market conditions, the Investment Manager does not anticipate that the Fund's exposure to cash or cash equivalents would exceed 10% of the NAV of the Fund.
- The Fund is long-only and will not have any short exposures.
- The Fund does not invest in financial derivative instruments. In the case of non-base currency classes, certain classes may seek to hedge against movements in exchange rates between the currency of the class and the base currency. There can be no assurance that such hedging transactions at class level will be effective so far as the Shareholders of the relevant classes are concerned.
- The Fund is actively managed and the Benchmark is used for performance measurement only. The Benchmark is not used for asset allocation and the Fund's investment policy is not constrained by the extent to which the weightings in the portfolio differ to the Benchmark and the degree of deviation from the Benchmark may be significant.
- Any income the Fund generates for this share class will not be distributed but continued to be accrued in the share price.
- You can buy and sell shares in the Fund on any day which is a working day in Dublin, the UK and the US. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.
- The mid-day index is a customised variant designed and maintained by MSCI, for alignment with this Fund's mid-day valuation point.

Risk and reward profile

↓ Lower risk			Higher risk ↓			
↓ Typically lower rewards			Typically higher rewards ↓			
1	2	3	4	5	6	7

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is not guaranteed and may change over time.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.
- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the ICAV's tax status or in legislation could affect the value of investments held by the ICAV.

- Political and/or regulatory risks.
- Emerging markets risk: Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. Investments in emerging markets' funds should not constitute a substantial portion of an investor's portfolio.

Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.
