

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Responsible Income Fund L-Class

L-Class Accumulation Units, ISIN: GB0008337569

The Manager is Jupiter Unit Trust Managers Limited.

SDR labels: This Fund complies with the requirements of the FCA's Sustainability Improvers Label. Improver Funds invest mainly in assets that may not be sustainable now, with an aim to improve their sustainability for people or the planet over time.

Objectives and investment policy

Objective

To provide income (with the prospect of capital growth) in order to achieve a return, net of fees, higher than that provided by the FTSE4Good UK Index over the long term (at least five years).

The sustainability objective is to invest in companies that have the potential to achieve net zero carbon dioxide equivalent (CO2e) emissions ("Net Zero") by 2050.

Policy

To invest at least 70% of the Fund in shares of companies that demonstrate their potential to achieve Net Zero by 2050 or sooner ("Sustainability Improver Companies"), that are incorporated, headquartered, listed or which conduct a majority of their business activity in the UK. Being a constituent of the FTSE4Good UK Index is not, in itself, considered sufficient to make a company a Sustainability Improver Company. The Fund may also invest up to 30% in other transferable securities (including non-UK Sustainability Improver Companies), cash, near cash, money market instruments and deposits. Investment in other transferable securities (including non-UK Sustainability Improver Companies), cash, near cash, money market instruments and deposits is for liquidity management purposes. The Fund will not invest in assets which conflict with the Fund's sustainability objective. The Fund may only enter into derivatives transactions for purposes of efficient portfolio management, i.e. to reduce risk, minimise costs or generate additional capital and/or income. The Fund may not enter into derivative transactions for investment (i.e. speculative) purposes.

Investment Strategy

Companies that demonstrate their potential to achieve Net Zero by 2050 or sooner (the "Standard") are "Sustainability Improver Companies". The Investment Manager uses the Net Zero Investment Framework (the "NZIF Framework") to determine whether a company has the potential to achieve the Standard.

The Investment Manager requires each investee company to meet at least category 2 (committed to align) of the NZIF Framework to be considered a Sustainability Improver Company, based on publicly available evidence. The long-term targets for all companies is to achieve the Standard by 2050 or sooner. The Investment Manager will set short- and medium-term targets for the Fund's portfolio, and each investee company within it, to demonstrate an investee company's improvement towards achieving the Standard. When selecting companies for investment by the Fund, the Investment Manager

applies an Exclusion Policy (disclosed on the following page: <https://dms-api.jupiteram.instinctcentral.io/documents/permalink/jupiter-responsible-income-fund-exclusions-policy.pdf>). It is possible that Sustainability Improver Companies may have a material negative impact on environmental and/or social outcomes in pursuit of the Fund's sustainability objective.

The Investment Manager will monitor and assess the Fund's progress in meeting the sustainability objective through key performance indicators at both fund and company level.

Benchmarks

Target benchmark - FTSE 4Good UK Index. The FTSE 4Good UK Index is an industry standard index and is one of the leading representations of companies in the UK stock markets that meet globally recognised corporate responsibility standards. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA UK Equity Income Sector. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA UK Equity Income Sector.

Active Management

The Fund is actively managed. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The Investment Manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- **Pricing Risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **Market Concentration Risk (Geographical Region/Country)** - Investing in a particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature.

- **Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- **Counterparty Default Risk** - the risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- **Charges from capital** - All of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.
- **Sustainability Investment Risk** - The Fund chooses its investments by considering the sustainability aspects as well as the potential for financial return. This means that investment returns in the Fund might differ from other investments that do not consider sustainability as part of the investment process. This may have a material negative impact on the value of the Fund's investments in certain sustainability-related scenarios.
- **Sustainability Data** - The Fund may use sustainability data from a number of sources which may be incomplete, inaccurate or inconsistent and may impact investment decisions.
- For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Scheme Particulars.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

Charges taken from the Fund over a year

Ongoing charges	1.62%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. With effect from 23/02/24 the fixed annual charge may be subject to a discount based on the value of the Fund's scheme property. The current discount rate, if applicable, can be found at www.jupiteram.com/uk/en/professional/tiered-pricing-on-the-fixed-annual-charge/. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.
