Term: The share of the Sub-Fund is issued in registered form. The Sub-Fund does not have a fixed maturity date and is established for an unlimited duration though it may also be dissolved by compulsory redemption upon a decision of the Directors (i) if its Net Asset Value has decreased below the minimum holding deemed appropriate for its existence in the interest of the Shareholders, or (ii) if a change in its economical or political situation would have material adverse consequences for its investments, or (iii) in order to proceed to an economic rationalization.

Objective: To outperform the reference benchmark over a full investment cycle generating attractive returns through capital growth and income by dynamically investing in a diversified portfolio of global fixed income instruments.

The Sub-Fund may use financial instruments to manage its exposure to various investment risks (hedging) and to seek investment gains.

Investment Process: The investment manager is actively managing the Sub-Fund and has all discretion with respect to the composition of the portfolio. The investment manager uses a global and dynamic approach which combines top-down strategic positioning in duration and credit with high conviction bottom-up security selection. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the Sub-Fund's capacity to pay you.
