The Management Company of the SICAV is Lemanik Asset Management S.A.

Objectives and investment policy

Objective: To provide investors with current income and the potential for medium to long term capital appreciation.

Portfolio Securities: Under normal conditions, Macquarie Supranational Emerging Markets LC Bond Fund (the "Sub-Fund") primarily invests in bonds and/or securitised debt instruments that are issued or guaranteed by supranational agencies. These instruments are primarily denominated in local currencies from emerging countries. To a lesser extent, the Sub-Fund may also invest in other bonds and/or other securitised debt instruments, money market instruments and cash when the Investment Manager expects returns from those securities to contribute to meeting the investment objective of the Sub-Fund and/or to enhance liquidity. At least 50% of the Sub-Fund's investment will be sustainable investments. The Sub-Fund may invest up to 10% of its net assets in Chinese bonds through the China Bond Connect. The Sub-Fund may use financial instruments to manage its exposure to various investment risks (hedging) and to seek investment gains.

Investment Process: The investment manager is actively managing the Sub-Fund and is not constrained by any benchmark. The Sub-Fund

promotes environmental, and/or social characteristics, as further described in the prospectus.

Designed for: This Sub-Fund may not be suitable for investors that want to withdraw their money within 5 years.

Benchmark: JPM Government Bond Index-Emerging Markets Global Diversified. The benchmark is a performance reference and the Sub-Fund's underlying portfolio may differ significantly to the benchmark composition.

Further details of other categories of investments that the Sub-Fund may make are set forth in Annex A of the Prospectus for the Sub-Fund.

You can place orders to buy or sell Sub-Fund shares at any time. Orders received on any given Luxembourg business day before 12 p.m. Luxembourg time will be processed at that day's share price.

Income earned by the Sub-Fund is accumulated in the net asset value of this class and not distributed.

Risk and reward profile

The risk indicator is based upon historical data and may not be a reliable indication for the future risk profile of the Sub-Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean a "risk free" investment. The Sub-Fund's risk level of 4 results from the following factors:

- The Sub-Fund invests primarily in bonds and/or securitised debt instruments that are issued or guaranteed by supranational agencies.
- The Sub-Fund primarily invests in emerging markets.

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than you paid for them. If your currency as an investor is different from the reference currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks. The Sub-Fund is subject to the following risks which may not be adequately captured by the indicator:

- The value of the Sub-Fund's investments may be negatively affected by changes in currency exchange rates. Adverse changes in exchange rates may reduce or eliminate any gains produced by investments that are denominated in foreign currencies and may increase any losses.
- Certain derivatives could increase the Sub-Fund's volatility or expose the Sub-Fund to losses greater than the cost of the derivatives.
- Certain securities could become hard to value, or to sell at a desired time and price.
- The value of the Sub-Fund's investments may be sensitive to changes in market perceptions of credit quality, both of individual issuers and of the credit markets in general.

For full details of the Sub-Fund's risks, please refer to the Prospectus available as mentioned in section "Risk Considerations".
