Dynamic Global Bond Fund

a sub-fund of T. Rowe Price Funds SICAV

Class An (EUR) (ISIN: LU1245572752)

Management company: T. Rowe Price (Luxembourg) Management S.à r.l.

Objectives and Investment Policy

Objective To generate income while offering some protection against rising interest rates and a low correlation with equity markets.

Portfolio securities The fund is actively managed and invests mainly in a portfolio of bonds of all types from issuers around the world, including emerging markets.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics ("E & S") is achieved through the fund's commitment to maintain at least 50% of the value of its portfolio invested in issuers and/or securities that are rated as 'Green' by the T. Rowe Price proprietary Responsible Investor Indicator Model (RIIM). The fund applies the T. Rowe Price RIIM Rating Criteria. The investment manager implements the following investment strategies: exclusion screen, RIIM green rating, monitoring and governance. Details of how E & S are promoted are further explained in the fund's Sustainability annex to the prospectus. <https://www.funds.troweprice.com/uk/en/>.

The fund may use derivatives for hedging, efficient portfolio management and to seek gains. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS)

Investment process The investment manager's approach is based on proprietary fundamental research and relative value analysis. The investment manager seeks to add value primarily through duration management, currency selection, sector allocation and security selection. The investment process places a strong emphasis on downside protection, utilizing robust risk management practices and portfolio diversification to manage the overall risk profile. The investment manager also assesses environmental, social and governance ("ESG") factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the funds' portfolio. These ESG factors, which are incorporated into

the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis.

Benchmark ICE BofA US 3-Month Treasury Bill Index. The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark index and has complete freedom to invest in securities that do not form part of the benchmark. However, at times, market conditions may result in the fund's performance being more closely aligned with that of the benchmark index.

Benchmark use For performance comparison.

Portfolio reference currency USD

Designed for Investors who plan to invest for the medium to long term.

Other Information:

Income generated by the fund is reinvested and included in the value of its shares.

Orders to buy, switch and redeem shares are ordinarily processed any day that is a full bank business day in Luxembourg except on days when markets, in which a substantial amount of the portfolio is traded, are closed or the day before. Please consult the following link, <https://www.troweprice.com/financial-intermediary/lu/en/funds.html>, for the dealing calendar and any applicable exceptions.

Orders received and accepted by 13:00 Luxembourg time on a business day will generally be processed that day.

Risk and Reward Profile

Lower Risk ← Higher Risk
Typically Lower Rewards → Typically Higher Rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market that is moderately volatile.

The fund's risk level reflects the following:

■ As a class, bonds carry higher risks than money market securities and lower risks than equities.

The fund is subject to fund-specific risks described below as well as generic risks. Certain risks are at least partially reflected in the risk/reward number.

MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

Main fund-specific risks that are not reflected in the risk/reward number include:

Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk

Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation.

Emerging markets are less established than developed markets and therefore involve higher risks.

High Yield Bond High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions.

MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS

Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other fund-specific risks, such as:

Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others.

Derivatives may be used to create leverage which could expose the fund to higher volatility and/or losses that are significantly greater than the cost of the derivative.

Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price.

Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.

A more detailed description of the risks that apply to the fund is set out in the section "Risk Descriptions" in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.
